7 MINUTES The Life & Death of the American Animated Cartoon

Norman M. Klein (1993)

Approaching the subject from a decidedly scholarly point of view, Klein examines the Gestalt of the Hollywood cartoon. He traces the social and aesthetic sensibilities that shaped and were reflected in the works of Disney, Warners, MGM and others, and reviews the graphics, scripts and marketing of each era. He details the internal production

and political structures of the studios and discovers links between cartoon and live action movies, newspapers, popular illustration, and the entertainment architecture coming out of Disneyland. Thoughtful analysis for the serious toon student.

TEX AVERY

Pierre Lambert (1993)

Yes... *another* big, fat beautiful Tex Avery coffee-table book from our French amis. Similar to the Brion book, but more a straight art portfolio - featuring the MGM years only. Text is in French but there's not much of it, and it's a whopping big collection featuring background fold-outs and even a serigraph cel-and-background set-up from *One Cab's Family*. Those who own the Brion book will find this focuses less on the films than on the artwork itself. Those disappointed with the grainy frame

blow-ups in Brion's book will be pleased by the exquisite color reproduction here, with most images taken directly from original cels and drawings. Chapters are laid out by year with a concise filmography.
